Subject: Navy Submarine Base Water Discharge Permit

To the Members of the Regional Water Quality Control Board:

I understand that the water discharge permit for the Navy Submarine Base is on the agenda for the April 10th meeting. In considering the conditions of this permit, I urge the Board to require that the Navy comply with as least as stringent conditions as those applicable to commercial shipyards, including diversion of the toxic stormwater flows. It is all one Bay and if it is to be clean the same standards must apply to all who use it. In fact, the Government should lead by example and be held to more, not less, stringent standards than those applicable to commercial operations.
